

1.3.3 Incorporating Pages Having Entire Page Effectivity Statements

Compare the effectivity statements of those pages having identical page numbers and determine which page(s) applies. Insert that page(s) in the FLM binder. Discard the page(s) that does not apply.

NOTE Do not discard pages having a page effectivity statement “After SB.....” that at present may not apply to the helicopter unless however, it is absolutely certain that the stated Service Bulletin will never be incorporated.

1.4 REVISION SERVICE

This manual is kept up-to-date by revisions and temporary revisions.

1.4.1 Revisions

Revisions are issued periodically. They are printed on white paper and are incorporated into the manual in accordance with a “Letter of Transmittal” sheet which need not be inserted in the manual. Revisions are numbered consecutively beginning with the number 1.

1.4.2 Minor Revisions

The publisher of this Flight Manual (EUROCOPTER) is authorized by the certifying authorities (EASA) to publish revisions when necessary to correct minor errors (typing errors, misprints, etc.) or minor changes without the requirement for certification by the authorities. In this case, the procedures for a normal revision apply, however, the revision numbering is modified in that the number of the last revision approved by the certifying authorities is used followed by a decimal point and then the minor revision number, e.g. Rev. 6.1, Rev. 6.2, etc.

1.4.3 Temporary Revisions

Temporary revisions are provided to transmit information between revisions. They are printed on yellow paper and are accompanied by a “Letter of Transmittal” sheet and an updated “List of Effective Temporary Revisions” page.

Temporary revisions are numbered consecutively beginning with the number 1; e.g. Temp. Rev. 1, Temp. Rev. 2, etc.

1.4.4 Identifying Revised Material

Changes (except as noted below) to the text and tables (including new material on added pages) are indicated by a vertical line in the outer margin.

Change symbols will not be shown for:

- Introductory material.
- Blank space resulting from the deletion of text, or an illustration or a part of an illustration, or table.
