

6. MASS AND BALANCE

6.1 EQUIPMENT LIST ENTRIES

System/Equipment Designation	Part No.	Mass (kg)	Arm (mm)	Massmoment (kgmm)
Self-sealing Fuel Tanks (Supply and Main)	105-84121	25.0	3100	77500
Self-sealing Fuel Tanks (Supply only)	105-84150	3.2	2300	7360

7. SYSTEM DESCRIPTION

The self-sealing fuel tanks are designed to minimize fuel loss caused by punctures. Each tank is double-walled having the area between the walls filled with a sealant material. This material reacts when it comes in contact with fuel, to plug small punctures.

Due to the double-wall tank construction, the maximum fuel capacity is reduced slightly.
