6.1 EQUIPMENT LIST ENTRIES

System/Equipment Designation	Part No.	Mass (kg)	Arm (mm)	Massmoment (kgmm)
High Clearance Landing Gear	105-51501	64.9	2400	155760

7. SYSTEM DESCRIPTION

The high clearance landing gear provides an additional ground clearance of 0.37 m (14.5 inches) and allows for installation of a fixed external load.

The high clearance landing gear, provided as a complete assembly to be exchanged with the basic skid landing gear, comprises a fore and an aft cross tube, extension legs, two skid tubes with protective shoes, steps, and the necessary installation hardware.

The mounts for fixed external loads are components of P/N 105-86111.
