

5. PERFORMANCE DATA

No change in the basic Flight Manual data.

6. MASS AND BALANCE

6.1 EQUIPMENT LIST ENTRIES

System/Equipment Designation	Part No.	Mass (kg)	Arm (mm)	Massmoment (kgmm)
Wire Strike Protection System	105-80080	14.83 (15.99)	1354 (1100)	20080 (17589)
NOTE Above values in parentheses apply to Model S Variants.				

7. SYSTEM DESCRIPTION

The Wire Strike Protection System, installed on the nose section of the fuselage, is designed to provide a measure of protection against impact damage from horizontally strung wires and cables during forward flight of the helicopter.

The reinforced deflector guide mounted on the windshield center post directs any wire encountered during low level forward flight to one of the cutters located on the lower nose and on the cabin roof of the helicopter. To preclude the possibility of horizontally strung wires below the level of the lower cutter being engaged by the skid gear, skid deflectors have been installed on both landing skids.
