

1.1 NVG OPERATIONS

NOTE This supplement does not include the approval of operation of the helicopter with night vision goggles.

Due to electromagnetic compatibility the night vision goggles must be approved for use in helicopters. Electromagnetic compatibility has been demonstrated for the night vision goggles "BM 8043 B" manufactured by "Deutsche Systemtechnik (DST)".

1.2 ABBREVIATIONS AND SYMBOLS

NVIS - Night Vision Imaging System

2. LIMITATIONS

Piloting the helicopter with night vision goggles is not approved, however, may be allowed if national regulations permit.

3. EMERGENCY AND MALFUNCTION PROCEDURES

3.1 WARNING AND CAUTION LIGHTS

NOTE The color tone of the warning and caution lights has been changed so as to be compatible with Night Vision Goggles (NVIS standard according to MIL 85762A). The legends and their respective procedures found in the basic FLM, however, remain unchanged.

4. NORMAL PROCEDURES

WARNING DO NOT PERFORM THE LAMP TEST DURING NVG OPERATION; THE FULL LAMP INTENSITY MAY CAUSE TEMPORARY BLINDNESS.

5. PERFORMANCE DATA

No change in the basic Flight Manual data.
