

3. EMERGENCY AND MALFUNCTION PROCEDURES

3.1 OEI DURING TAKEOFF

If one engine fails before TDP the takeoff must be rejected.

If one engine fails after TDP the takeoff must be continued.

Rejecting/continuing takeoff: Refer to the respective type of operation subsection of this supplement.

3.2 OEI DURING LANDING

If one engine fails before LDP the pilot may elect to go-around or to continue the approach.

If one engine fails after LDP the landing must be continued.

Go-around/single-engine landing: Refer to the respective type of operation subsection of this supplement.

4. NORMAL PROCEDURES

Refer to the respective type of operation subsection of this supplement.
