

SECTION 3

EMERGENCY AND MALFUNCTION PROCEDURES

3.1 GENERAL

This section contains the recommended procedures for coping with various types of emergencies, malfunctions and critical situations.

WARNING AFTER AN ACTUAL EMERGENCY OR MALFUNCTION MAKE AN ENTRY IN THE HELICOPTER LOGBOOK AND, WHEN NECESSARY, THE EFFECTED SYSTEM LOGBOOK (E.G. ENGINE LOGBOOK). MAINTENANCE ACTION MAY BE REQUIRED AND NECESSARY BEFORE THE NEXT FLIGHT.

For definitions of terms, abbreviations and symbols used in this section, refer to section 1.

3.1.1 Basic Rules

These procedures deal with common emergencies. However, they do not prevent the pilot from taking additional action necessary to recover the emergency situation.

Although the procedures contained in this section are considered the best available, the pilot's sound judgement is of paramount importance when confronted with an emergency.

To assist the pilot during an inflight emergency, three basic rules have been established:

1. Maintain aircraft control
2. Analyse the situation
3. Take proper action.

NOTE It is impossible to establish a predetermined set of instructions that would provide a ready-made decision applicable to all situations.

3.1.2 Memory Items

Emergency procedure steps which shall be performed immediately without reference to either this manual or the pilot's checklist are written in boldface letters on a gray background (as shown here) and shall be committed to memory.

Therefore, those emergency procedure steps appearing without boldface letters may be accomplished referring to either this manual or the pilot's checklist, and when time and situation permit.
